EXPERIENCE

MedInformatix, Los Angeles, CA (March '17 – November '18)
Web Developer

Project Lead:
• Team lead for the File Uploader Project. Managed, organized, planned and motivated team members. Developed front end for the file uploader with all main browser/device compatibility. Designed the architecture for the file uploader cloud infrastructure using S3, Lambda, and API Gateway. Presented demonstrations to major clients and received positive feedback.

Created/Developed:
• Quality Reporting Tool for ONC 2015 requirements
• Patient Center app using React Native
• Patient Portal Quick Installer using Node JS and Amazon Web Services
• New features for the Patient Portal and worked on bug fixes
• Internal design system for rapid development and prototyping
• Chat application with publish/subscribe pattern using WebSockets
• New features for the Web Scheduler (sending patient questionnaires to the server) and worked on bug fixes
• Documentation website for the Reporting app with an animated step-by-step tutorial
• Secured S3 bucket objects from being made public

Medinformatix, Los Angeles, CA (June '16 – March '17)
Application Specialist
• Maintain multiple departments – ERX (electronic prescribing), EMR, billing and patient/provider portals on a daily basis
• Application and web portal installation, configuration, and maintenance
• Automate redundant tasks with stored procedures in SQL in effort to streamline productivity

CaseStack, Los Angeles, CA (January '15 – June '16)
Software Support Specialist
• Independently oversee and manage web support department queue (250+ employees, 1000+ customers)
• Identify root causes of issues and determine ways to repair them for future use
• Prioritize and organize project queues with respect to time sensitivity and urgency
• Use SQL Server to create queries, updates, inserts and stored procedures for troubleshooting

Good Life Youth Foundation, Syracuse, NY (July '14 – December '14)
Wordpress Developer/ Intern
• Implement social media presence to promote "80 for 80" charity event
• Add video media content of local news coverage to website
• Design new website structure and layouts using Wordpress
